SUMMARY

Python developer and CSE graduate specializing in AI ML, with hands-on experience building GenAI applications, RAG pipelines, and multi-agent LLM workflows. Skilled in Python, FastAPI, Flask, REST APIs, SQL/NoSQL databases, and AWS, with a strong foundation in DSA and software development.

EDUCATION

Bachelor of Technology in CSE (AI & ML) Malla Reddy University, Hyderabad	2022 – 2026 CGPA: 8.91
Intermediate (MPC) Narayana Junior College	2020 – 2022 Percentage: 83.2%
SSC J.M.J English Medium High School	2019 – 2020 GPA: 8.0/10.0

TECHNICAL SKILLS

Programming: Python, SQL
GenAI & Agentic AI: LLMs, RAG (Retrieval-Augmented Generation), Machine Learning, TensorFlow, Pytorch, Vector Databases, NLP
Backend & APIs: FastAPI, Flask, Django, REST APIs, JWT Authentication
Frontend: React, HTML, CSS
Databases: MySQL, MongoDB, DBMS, Vector Databases
Cloud & DevOps: AWS (EC2, S3), Docker, Git, CI/CD Workflows
Computer Science: Data Structures & Algorithms, OOP, Computer Networks
Tools: Git, Postman, Streamlit, VS Code
Professional Skills: Problem Solving, Analytical Thinking, Communication, Adaptability

INTERNSHIP

Software Engineering Intern 1 Month
Neeyat AI Hyderabad, India
Internship Certificate: [View](#)

- Developed responsive React-based interfaces for AI applications and integrated frontend components with backend APIs for production-ready deployment.
- Deployed and maintained services on AWS EC2 and Amazon S3, gaining hands-on exposure to cloud-based application delivery.
- Collaborated on application development tasks involving debugging, API integration, and software engineering workflows in an Agile team setting.

PROJECTS

AI Travel Planning Application – Agentic GenAI Workflow Next.js, Vercel AI SDK
Live: [Demo](#)

- Technology Stack:** Next.js, Vercel AI SDK, Supabase, jsPDF
- Built and orchestrated an **agentic GenAI workflow** using **3 chained LLM agents** (Destination Analyzer, Route Optimizer, and Day Planner) powered by **Groq Llama-3.3** to generate personalized, context-aware itineraries.
 - Designed sequential agent-to-agent prompting and tool-use logic to analyze destinations, optimize routes, and generate structured travel plans.
 - Integrated **Supabase** for authentication/storage and **jsPDF** for downloadable itineraries.

AI Resume-Based Interview Bot – NLP & LLM Pipeline Python, NLP, Streamlit
Live: [Demo](#)

- Developed an AI-powered system that extracts structured resume data and generates role-specific interview questions using an LLM-driven NLP pipeline.
- Built reusable components for text extraction, parsing, and feature enrichment to accelerate question generation.
- Designed dynamic interview workflows generating technical and behavioral questions tailored to candidate profiles, with modular components for HR/ATS integration via REST APIs.

SkinScan – Skin Cancer Detection System Python, CNN, TensorFlow

- Developed a deep learning-based skin cancer detection system using CNN models trained on 1,000+ skin lesion images.
- Applied image preprocessing, data augmentation, and normalization to improve model performance, evaluated using precision, recall, and classification metrics.

CERTIFICATIONS

AWS Cloud | Google AI/ML Internship | Deloitte Job Simulation | NPTEL | Python – University of Michigan | AICTE AIML Developer

ADDITIONAL

Languages: English, Telugu, Hindi
Strengths: Problem Solving, Communication, Teamwork, Leadership, Adaptability
