

Dondapati Karthikeya

Aspiring GenAI & Document AI Engineer

Hyderabad, Telangana — +91-6309554591 — karthikeyadondapati94@gmail.com — LinkedIn — GitHub

Career Objective

B.Tech (CSE – AI & ML) graduate with hands-on experience building GenAI applications via LLM prompt chaining, multi-agent workflows, and an OCR-based document recognition system. Strong Python and ML foundation through academic projects; curious and eager to learn new AI tools, seeking a GenAI / Document AI internship to contribute to prototype development and applied AI research.

Education

B.Tech in Computer Science Engineering (AI & ML)

Mallareddy University, Hyderabad

2022 – 2026

Percentage: 83%

Intermediate Education (MPC)

Sri Vidya Junior College, Kodad

2020 – 2022

Percentage: 94.5%

Secondary School Education (SSC)

Sri Chaitanya Techno School, Kodad

2019 – 2020

Percentage: 95%

Technical Skills

- **GenAI & NLP:** Prompt Engineering, LLM Integration (Groq API, Llama-3.3), Multi-Agent Workflows, RAG, Large Language Models, NLP Basics
- **OCR & Document AI:** OCR (YOLOv5-based text/plate recognition), Document Data Extraction, Image Preprocessing
- **Programming Languages:** Python, SQL
- **Machine Learning:** Scikit-learn, XGBoost, TensorFlow/Keras, Model Evaluation & Tuning
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Development Background:** Django, Flask, FastAPI, REST API
- **Databases & Tools:** MySQL, PostgreSQL, MongoDB, Vector Databases, Git, Postman
- **Professional Skills:** Analytical Thinking, Curiosity to Learn New Tools, Problem Solving, Communication, Documentation

Projects

AI-Powered Multi-Agent India Travel Planner

Stack: Python, Next.js, Groq API, Vercel AI SDK, PostgreSQL (Supabase), REST API, JWT

- Built a backend-driven **multi-agent GenAI workflow** with 3 chained LLM agents (Destination Analyzer, Route Optimizer, Day Planner) using Groq's Llama-3.3 to orchestrate end-to-end itinerary generation via **REST APIs**.
- Designed sequential agent-to-agent **prompt engineering** and tool-use logic to analyze destinations, optimize routes, and produce structured, dynamic day-wise plans.
- Integrated **PostgreSQL (Supabase)** for JWT-based authentication and data storage, with jsPDF for downloadable itinerary PDFs.

Internship

Python Developer Intern — DRDOT Solutions

May 2025 – Sep 2025

- Built a **Number Plate Recognition system** using **YOLOv5** and **OCR**, reaching **~95% accuracy** through preprocessing and model tuning – direct experience extracting structured data from document/image input.
- Developed a **React-based restaurant ordering platform** with an **LLM-powered chatbot** using **JSON** menu data, applying **prompt design** to improve response accuracy and enable conversational ordering.
- Debugged and tested application code to fix issues and improve reliability.

Social Bot Detection System

Stack: Python, Django, MySQL, Scikit-learn, XGBoost, TensorFlow/Keras

- Built a full-stack **Django** web application to detect social media bots; trained and compared **5 ML models** (Logistic Regression, Random Forest, SVM, **XGBoost**, Keras ANN) on engineered behavioral features.
- Handled class imbalance via resampling and feature scaling; designed a **MySQL-backed** pipeline for real-time, confidence-based classification.

Liver Disease Prediction System

Stack: Python, Flask, Scikit-learn, SQL

- Cleaned and analyzed a real-world medical dataset; built a **Scikit-learn** model improving prediction performance by **12%** through feature engineering and hyperparameter tuning.
- Built and deployed a **Flask** web application enabling real-time liver disease risk predictions from user-input health data.

Certifications

- AWS Academy Cloud Foundations
- Deloitte Data Analytics Virtual Experience
- Accenture Data Analytics Virtual Experience
