

Dondapati Karthikeya

Hyderabad, Telangana — +91-6309554591 — karthikeyadondapati94@gmail.com — LinkedIn — GitHub

Career Objective

B.Tech graduate in Computer Science Engineering (AI & ML) with a strong foundation in Python, Object-Oriented Programming, Data Structures, DBMS, REST APIs, and web application development. Hands-on experience building scalable applications using Flask, Django, FastAPI, React, and databases. Strong analytical, problem-solving, and communication skills with a keen interest in learning Enterprise Application Development, APIs, B2B Integration, EDI, and cloud technologies. Eager to build a long-term career in enterprise technology and integration solutions.

Education

B.Tech in Computer Science Engineering (AI & ML)	2022 – 2026
Mallareddy University, Hyderabad	Percentage: 83%
Intermediate Education (MPC)	2020 – 2022
Sri Vidya Junior College, Kodad	Percentage: 94.5%
Secondary School Education (SSC)	2019 – 2020
Sri Chaitanya Techno School, Kodad	Percentage: 95%

Technical Skills

Programming: Python, SQL

Core CS: Object-Oriented Programming (OOP), Data Structures, DBMS, Operating Systems, Computer Networks

Frameworks & Libraries: Flask, FastAPI, Django, React.js, REST APIs

Databases: Vector Databases, MongoDB, MySQL, DBMS

AI/ML & GenAI: Machine Learning, TensorFlow, PyTorch (basic), LLMs, RAG, NLP, Prompt Engineering

Security & DevOps: JWT, OAuth, Git, GitHub, CI/CD

Cloud: AWS Cloud Foundations

Computer Vision: YOLO, OCR, OpenCV, Image Processing

Professional Skills: Problem Solving, Analytical Thinking, Communication, Adaptability

Projects

AI-Powered Multi-Agent India Travel Planner

Technology Stack: Next.js, Groq API, Vercel AI SDK, Supabase, jsPDF

- Built a **multi-agent GenAI workflow** with **3 chained LLM agents** (Destination Analyzer, Route Optimizer, Day Planner) using **Groq's Llama-3.3** to orchestrate end-to-end itinerary generation.
- Designed sequential agent-to-agent prompting and tool-use logic to analyze destinations, optimize routes, and produce structured, dynamic day-wise plans.
- Integrated **Supabase** for auth/storage and **jsPDF** for downloadable itinerary PDFs.

LGB: Language Model and Graph Neural Network-Driven Social Bot Detection

Technology Stack: Python, GNN, Random Forest, Django, React

- Developed an AI-powered bot detection system using **Graph Neural Networks (GNN)** and **Random Forest** with behavioral feature engineering.
- Built **Django REST APIs** and a **React dashboard** for suspicious account analysis and real-time prediction insights.
- Improved model F1-score through cross-validation, hyperparameter tuning, and ensemble modeling.

Liver Disease Prediction

Technology Stack: Python, Random Forest, Flask, Scikit-learn

- Preprocessed real-world medical datasets with EDA and Scikit-learn pipelines; engineered high-impact predictive features.
- Developed a **Random Forest** model achieving **12% higher F1-score** over baseline via hyperparameter tuning.
- Deployed a **Flask-based** web application for clinical liver disease risk prediction and early diagnosis.

Internship

Machine Learning Intern — DRDOT Solutions

May 2025 – Sep 2025

- Developed a real-time **Number Plate Recognition (NPR)** system using **YOLOv5**, achieving **~95% accuracy** through OCR optimization, preprocessing, and model fine-tuning.
- Built a **React-based restaurant platform** with a **RAG chatbot** using vector embeddings over **JSON menu data** to recommend dishes and let customers order food directly through the chat interface.

Certifications

- Deloitte Data Analytics Virtual Experience
- Accenture Data Analytics Virtual Experience
- AWS Academy Cloud Foundations
