AI Data Scientist

B.Tech Computer Science (AI & ML) undergraduate with hands-on experience in applied machine learning, Generative AI, and data analytics. Proven ability to build end-to-end AI systems involving data ingestion, preprocessing, modeling, evaluation, and visualization. Experienced in computer vision, RAG-based LLM applications, and AI agent workflows.

Technical Skills

- **Programming & Data:** Python, SQL, Pandas, NumPy
- **Machine Learning:** Supervised ML, Feature Engineering, Model Evaluation
- **Computer Vision:** YOLOv5, OpenCV, Image Preprocessing, OCR (ANPR)
- **Generative AI:** LLMs, RAG, Prompt Engineering, AI Agents
- **Data Visualization:** Power BI
- **Tools & Platforms:** LangChain, FastAPI, Pinecone,

Work Experience

Machine Learning Intern

Jan 2025 – May 2025

DRdotSolution (Remote)

- Developed and integrated a YOLOv5-based Number Plate Recognition (ANPR) system for real-time vehicle detection.
- Built end-to-end ML pipelines including data preprocessing, model inference, and backend API integration.
- Optimized inference workflows, improving processing speed by 35%.
- Designed a Retrieval-Augmented Generation (RAG) chatbot using structured restaurant menu JSON data.
- Improved chatbot response relevance by 40% using vector-based retrieval techniques.
- Assisted in testing, validation, and documentation of ML outputs for production readiness.

Selected Projects

GenAI-Powered Medical Diagnosis System

- Built an end-to-end RAG-based GenAI system to analyze patient medical reports.
- Implemented document ingestion, text chunking, embedding generation, and semantic retrieval.
- Integrated LLM inference to generate structured diagnostic insights and recommendations.

AI Agent-Based Travel Planner

- Developed a multi-agent AI system to generate personalized travel itineraries based on user preferences.
- Designed autonomous agents for destination selection, itinerary planning, and budget optimization.
- Implemented vector-based retrieval for contextual recommendations using a vector database.
- Applied prompt engineering and agent coordination to improve response relevance and consistency.

End-to-End Cricket Data Analytics (Python & Power BI)

- Scraped and processed 5,000+ match and player records using Python.
- Cleaned and transformed datasets, improving data quality by 70%.
- Built Power BI dashboards to analyze player performance metrics.

Education

B.Tech in Computer Science Engineering (AI & ML)

2022 – 2026

Mallareddy University, Hyderabad

CGPA: 8.63

Certifications

Deloitte Data Analytics Virtual Experience

Accenture Data Analytics Virtual Experience
